SUMMARY

Seeking a Software Developer role to apply full-stack expertise in building robust solutions that enhance performance and user experience.

EDUCATION

Kongu Engineering College

B.Tech Artificial Intelligence and Machine Learning

2022-2026 | CGPA: 8.48

Green Park Matric Higher Secondary School

HSC 2022 | PERCENTAGE: 88.50

Sengunthar Vidhyalaya Matriculation School

SSLC 2020 | PERCENTAGE: 71.60

AREAS OF INTEREST

- Full-stack development
- Machine learning
- Deep learning

TECH STACK

- Languages:** Java, Python, C, JavaScript
- Web Development:** React.js, Node.js, Express.js
- Frontend:** HTML, CSS
- Database:** MongoDB, MySQL
- Version Control:** Git, GitHub
- Tools:** TensorFlow, Keras, Scikit-learn, NLTK
- Data Analysis:** Power Bi

CERTIFICATIONS

- NPTEL:** Business Analytics for Management Decision
- NPTEL:** Machine Learning for Soil and Crop Management

POSITIONS OF RESPONSIBILITY

- Executive Member: AI Association, AI Coding Club, Self-Development Club
- Class Representative: 3rd Sem (Aug 2023 - Jan 2024) and 6th Sem (Jan 2025 - Jun 2025)

PROFESSIONAL EXPERIENCE

Shine Logics

Jun 2024 - Dec 2024

Full-Stack AI Engineer

Coimbatore

Designed and implemented an AI-driven interview platform using Groq API, improving hiring efficiency by 30%. Built a dynamic UI with React.js and scalable backend services using Node.js and Express.js. Optimized deployment with MongoDB for secure data management and high scalability.

Genpixels India Pvt Ltd

Aug 2023 - Sep 2023

Web Designing Intern

Coimbatore

Developed responsive web pages using React.js, HTML, and CSS, enhancing user engagement.

Implemented interactive features and optimized functionality with React.js and Node.js. Collaborated with the team to ensure seamless integration between frontend, backend and database services.

PROJECTS

COSU AI – AI-Powered Resume Builder and Cover Letter Generator

Led the development of an AI-powered solution for generating resumes and cover letters

– Tools: React.js, Node.js, Express.js, MongoDB, Python.

– Developed an AI-powered web application for generating professional resumes and cover letters.

Skin Cancer Classification using Transfer Learning

Developed a deep learning model to classify skin cancer types using transfer learning techniques

– Tools: TensorFlow, Keras, Python, OpenCV.

– Achieved 95% accuracy in classifying skin cancer types using pre-trained models like ResNet and VGG16.

ACR Prints – AI-Powered Printing Services Web Platform

Led the development of a full-stack web application for a printing and design services company with integrated customer engagement features

– Tools: React.js, TypeScript, Node.js, Express.js, MongoDB, Groq API

– Developed a web platform with service listings, pricing, and portfolio sections, along with an AI-powered bilingual chatbot for customer support

A Cross-Model Attention Driven Multi-Task Learning Framework for Robust Multimodal Hate Speech Detection

Led the development of a deep learning-based multimodal system for detecting hate speech in memes by analyzing complex interactions between textual and visual content

– Tools: Python, PyTorch, Transformers, NLP, Scikit-learn

– Designed and implemented a cross-model attention mechanism for enhanced interaction between multimodal features and developed a multi-task learning framework to improve generalization across multiple datasets
